

MAYOR'S CORNER

I have often mentioned in my past articles that in order to grow our town we need many “ingredients” to attract and then sustain the addition of new families. Obviously we need new residential developments for future homeowners to locate. In order to increase the number of households we need to expand our water and sewer infrastructure. As we add new families we then also need to increase our facilities for recreational and social programs. With our future growth we will then attract additional businesses to provide products and services for the needs of our citizens.

With cautious optimism, I will say that New Market is working toward achieving these goals. We have attracted the interest in developing land in, and around, our town for residential growth. We are preparing to build a much needed water storage tank to expand supply for our growth. With the acceptance of ownership of the Community Center, we will be expanding our social and recreational programs. We have applied for grants as well as earmarked some of American Rescue Plan Act (ARPA) funds towards remodeling the center.

All of what I mention above is stating the obvious for the growth of any town. However, what is overlooked should be the first on the list of a town wanting to grow. Our first responders, including police, fire and rescue personnel! These professionally trained men and women are always on call to respond for our emergencies. As a member of the town council I receive Chief Rinker's monthly report of the various calls they respond to at all hours of the day. Assault, fraud, disturbance, suspicious person/vehicle, larceny as well as Emergency Custody Order (ECO) and Temporary Detention Order (TDO). This is just a fraction of the police calls so I can only imagine the demands for fire and rescue.

Therefore, to grow our town of New Market we need not overlook the obvious. We need to provide the funds for our police, fire and rescue departments for their equipment, personnel and training. Your voice of thanks to our dedicated and professionally trained first responders is always appreciated.

Larry A. Bompiani
Mayor

ACH AVAILABLE FOR PAYMENT OF YOUR UTILITY BILL

We know how busy our customers are and how quickly the due date comes around for water/sewer bills. We want to remind citizens that we offer the option of paying their water bill through automatic deduction (ACH) from their bank account each month. This could save writing a check, paying postage, or even a trip to the Town Office. Forms for ACH can be picked up in the Town Office or downloaded from the Residents tab of the Town's website, www.newmarketvirginia.com. Completed forms should be returned to the Town Office. Automatic deductions will be deducted from your bank account around the fifteenth of each month. The amount due on your bill is the amount that will be deducted from your account. If you have questions or want to know more about this service, please call the Town Office at 540-740-3432.

LOAVES AND FISHES FOOD PANTRY

Loaves and Fishes food pantry is located in the basement of Manor Memorial Methodist Church (9320 North Congress Street). The basement entrance is located in the back of the church along John Sevier Road. The pantry is open to all on the 3rd Thursday of every month from 1:00-5:00 p.m.

RECYCLABLES ACCEPTED AT THE NEW MARKET COMMUNITY CENTER SITE:

The following materials are accepted for recycling at any of the 15 specially marked collection containers located throughout the County:

1. **Cardboard & Paper:** Newspaper, office paper, magazines, cardboard including cereal boxes.
2. **Aluminum:** Cans, plates, foil, and smaller items.
3. **Tin/Steel cans:** All food cans and containers with tin coating.
4. **Glass:** All colors of glass.
5. **Plastic:** Only plastic numbers 1 and 2 in bottle or jug form.

Note: Please make sure recyclables are cleaned of food and other contaminants. Discounted recycling bins are available at the Landfill office.

See <http://www.shenandoahcountyva.us/landfill/recycling-bins-prices/>.

LIBRARY NEWS

The New Market Area Library will be providing a variety of programs for children this summer!

A reading incentive program will be held for children ages birth to fifth grade. A teen reading incentive program will also be held. Pick up your reading logs at the library

Each participant will earn a free book by reading and can also enter drawings for other fabulous prizes!

Weekly programs will feature stories, crafts (often Take It, Make It), and more! Programs may be added to or changed; check the library Facebook page for the latest information! Please note program locations and times, they will vary!

- Friday, June 17, 10:00 am: Kick Off Program Oceans of Possibilities: Ocean theme with various water play stations and a bubble machine. Dolly Parton Imagination Library will be there too!

Make your own Ocean tote bag and sign up for Summer Reading!

- Wednesday, June 22, 10:00 am: Under the Sea Story Time: Stories, songs and a take home craft with Miss Becky. Each child will receive a plush Under the Sea reading buddy.

- Thursday, June 30, 11:00 am: Make a Splash Story Time at the New Market Community Park picnic shelter. All children attending will get a free admission ticket to the pool!

- Thursday, July 7, 10:00 am: Reading with the Rebels at Rebel Park. Come read with your favorite Rebel players! Ball play, crafts, snacks and more fun at the ballpark!

Check out our FB page for the full line up of summer programs!

ADJUSTMENT POLICY FOR FILLING SWIMMING POOLS

Swimming pool adjustments will be limited to one (1) adjustment per calendar year per customer. To qualify for this annual adjustment, the customer must submit an Application for Swimming Pool Credit prior to the filling of a swimming pool. In addition, the meter must be read by Town staff before and after the filling of the pool. Customers that are billed for water only or have a water-only meter will not qualify for a pool credit. Splasher pools also known as "kiddie" pools, hot tubs, or spas will not qualify for a pool adjustment. Please contact the Town Office at 540-740-3432 for a copy of the guidelines and an Application for Swimming Pool Credit. Applications are also available on our website at www.newmarketvirginia.com.

INDEPENDENCE DAY CELEBRATION

The Independence Day Committee is hard at work planning this year's Independence Day Celebration. This celebration comes together with partnerships of several individuals that makes up our 501c3 nonprofit group, along with the Town of New Market.

Each year the Independence Day Committee asks YOU the citizens and businesses of New Market to help support our efforts. This support helps with growing activities, entertainment, marketing and more. We are humbly asking you to contribute to this effort with financial support.

If interested in sponsoring, funds can be mailed to PO Box 1103 New Market, VA 22844 or if you would like to discuss sponsorship benefits, we would be happy to discuss.

For more information you can contact Jim Douglas at 540-630-1503 or Amber Smoot at 540-740-2620.

You can mark those calendars for July 5th, 2022 for our next celebration!

SHENANDOAH VALLEY BATTLEFIELDS FOUNDATION PRESENTS: CIVIL WAR KIDS CAMP

Civil War Kids Camp

June 30th at 9500 George Collins Pkwy, New Market, VA 22844

Drop off: 9-9:30 am

Camp: 9:30-11:30 am

Pick up: 11:30-12:00 pm

\$20 registration fee (comes with souvenir)

-Pre-registration is required

-Need-based scholarships available

Ages 6-14

Campers will engage in various activities such as, Civil War period games, learn about women of the Civil War, as well as learn about camp and soldier life during the Civil War. Witness musket and cannon demonstrations as well as blacksmithing. To register, go to our website www.shenandoahatwar.org and for more information call us at 540-740-4545.

LOOKING AHEAD, AND MARK THOSE CALENDARS:

Looking ahead, and Mark those Calendars:

Movie Nights in the Park- July 23rd, August 27th, and September 17th
(all start at sundown)

Cross Roads Music Fest- July 8th, August 12th, and September 2nd

Congress Street Block Party- July 28th starts at 5:00 pm

For more details about the events, check out our Festivals and Events page on our website www.newmarketvirginia.com

Annual Drinking Water Quality Report

Town of New Market

INTRODUCTION

This Annual Drinking Water Quality Report for calendar year 2021 is designed to provide you with valuable information about your drinking water quality. We are committed to providing you with a safe and dependable supply of drinking water, and we want you to understand the efforts we make to protect your water supply. The quality of your drinking water meets all state and federal requirements administered by the Virginia Department of Health (VDH).

If you have questions about this report, want additional information about any aspect of your drinking water, or want to know how to participate in decisions that may affect the quality of your drinking water, please contact:

Mr. John Griggs, Chief Operator, Town of New Market, 540-740-9576

You can obtain additional information by attending Town Council meetings held at 6:30 p.m. the third Monday of each month in the Town Council Chambers.

GENERAL INFORMATION

As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and can pick up substances resulting from the presence of animals or from human activity. Substances (referred to as contaminants) in source water may come from septic systems, discharges from domestic or industrial wastewater treatment facilities, agricultural and farming activities, urban storm water runoff, residential uses, and many other types of activities. Water from surface sources is treated to make it drinkable while groundwater may or may not have any treatment.

All drinking water, including bottled drinking water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791) or by visiting their website at EPA.gov.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immune-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

SOURCES AND TREATMENT OF YOUR DRINKING WATER

For calendar year 2021, your drinking water came from groundwater and groundwater under the influence of surface water obtained from six drilled wells. Water is distributed throughout Town by a booster pump station, one storage tank and variously sized distribution piping.

Treatment of Wells 1 and 6 consists of chlorination. As water is pumped from the wells, a chlorine solution is injected into a combined well discharge line to disinfect the water prior to distribution.

Treatment of Wells 2, 4, 8, and the Shenandoah Valley Academy (SVA) Well consists of membrane filtration and chlorination. Water pumped from the wells passes through a basket strainer to pretreat the water prior to membrane filtration and chlorination. The membrane filtration eliminates turbidity and bacteria from the water while chlorination is used to disinfect the water prior to distribution.

SOURCE WATER ASSESSMENTS

A source water assessment for the Town of New Market was completed by the Virginia Department of Health (VDH). This assessment determined that the Town's water sources may be susceptible to contamination because they are groundwater or surface influenced groundwater exposed to a wide array of contaminants at varying concentrations. Changing hydrologic, hydraulic, and atmospheric conditions promote migration of contaminants from land use activities of concern within the assessment area. More specific information may be obtained by contacting the water system representative referenced within this report.

QUALITY OF OUR DRINKING WATER

Your drinking water is routinely monitored according to Federal and State Regulations for a variety of contaminants. The table on the next page shows the results of our monitoring for the period of January 1 to December 31, 2021.

Most of the results in the table are from testing done in 2021. However, the state allows us to monitor for some contaminants less than once per year because the concentrations of these contaminants do not change frequently. Some of our data, though accurate, is more than one year old.

DEFINITIONS

In the table and elsewhere in this report you will find many terms and abbreviations you might not be familiar with. The following definitions are provided to help you better understand these terms:

Action Level (AL): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Level 1 Assessment: A level 1 assessment is a study of the water system to identify potential problems and determine, if possible, why total coliform bacteria have been found in our water system.

Level 2 Assessment: A level 2 assessment is a very detailed study of the water system to identify potential problems and determine, if possible, why an E-coli MCL violation has occurred and/or why total coliform bacteria have been found in our water system on multiple occasions.

Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL): The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG): The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contamination.

Nephelometric Turbidity Unit (NTU): A measure of the clarity of water. Turbidity in excess of 5 NTU is just noticeable to the average person.

Non-detects (ND): Lab analysis indicates that the contaminant is not present.

Parts per billion (ppb) or Micrograms per liter ($\mu\text{g/L}$): One part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

Parts per million (ppm) or Milligrams per liter (mg/L): One part per million corresponds to one minute in two years or a single penny in \$10,000.

Picocuries per liter (pCi/L): A measure of the radioactivity in water.

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in drinking water.

Variances and exemptions: State or EPA permission not to meet an MCL or a treatment technique under certain conditions.

WATER QUALITY RESULTS

We constantly monitor for various contaminants in the water supply to meet all regulatory requirements. The tables below list only those contaminants that had some level of detection. Many other contaminants have been analyzed but were not present or were below the detection limits of the lab equipment.

Maximum Contaminant Levels (MCL's) are set at very stringent levels by the U.S. Environmental Protection Agency. In developing the standards EPA assumes that the average adult drinks 2 liters of water each day throughout a 70-year life span. EPA generally sets MCL's at levels that will result in no adverse health effects for some contaminants or a one-in-ten-thousand to one-in-a-million chance of having the described health effect for other contaminants.

VIOLATION INFORMATION

We are in full compliance with all water quality, monitoring and reporting requirements and no violations occurred during the calendar year 2021.

Lead Contaminant Information

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The Town of New Market is responsible for providing high quality drinking water, but cannot control the variety of materials used in the plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on the lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline (800-426-4791) or at <http://www.epa.gov/safewater/lead>.

The New Market waterworks collected ten samples in August 2020 to measure Lead and Copper levels in residential buildings. One sample had an elevated Copper level and two samples had elevated Lead levels. Subsequently the waterworks has increased monitoring and is testing additional parameters. The 2021 Lead and Copper levels were within the normal limits and below the MCL as shown in the Table below.

Microbiological – At least two bacteriological samples are collected from the distribution system each month.

Contaminant	Unit of Measurement	MCLG	MCL	Level Found	Violation	Date of Sample(s)	Typical Source of Contamination
Total Coliform bacteria	presence or absence	0	presence of coliform bacteria in >1 sample per month	0	No	monthly	naturally present in the environment

Coliforms are bacteria that are naturally present in the environment and are used as an indicator that other, potentially-harmful, waterborne pathogens may be present or that a potential pathway exists through which contamination may enter the waterworks.

Turbidity ¹								
Contaminant/Unit of Measurement	MCLG	MCL	Highest Level Found	Lowest Monthly % <0.3 NTU	Violation	Date of Sample	Typical Source of Contamination	
Turbidity NTU	NA	TT ²	0.43	97%	No	Daily	Soil Runoff	
¹ Turbidity is a measure of the cloudiness of the water. We monitor it because it is a good indicator of our water quality and the effectiveness of the filtration process.								
² Turbidity TT = 1 NTU Max; ≤ 0.3 NTU in at least 95% of all samples tested.								
Inorganic Contaminants								
Contaminant/ Unit of Measurement	MCLG	MCL	Level Found		Violation	Date of Sample		Typical Source of Contamination
			Rt. 211 Plant	Well 1/6		Rt. 211 Plant	Well 1/6	
Barium ppm	2	2	0.035	0.022	No	2021	2022	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits
Nitrate ppm	10	10	3.16	5.54	No	2021	2021	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits
Sodium Ppm	-	-	33.7	8.15	NA	2021	2022	Erosion of natural deposits; de-icing salt runoff; water softeners
*There is presently no established standard for sodium in drinking water. An EPA advisory recommends water containing 30 to 60 mg/L should not be used as drinking water due to esthetics such as taste and color. Water containing more than 20 mg/L should not be used by persons whose physician has placed them on severely restricted sodium diets.								
Radiological Contaminants								
Contaminant/Unit of Measurement	MCLG	MCL	Level Found		Violation	Date of Sample		Typical Source of Contamination
			Rt. 211 Plant	Well 1/6		Rt. 211 Plant	Well 1/6	
Beta emitters pCi/L	0	50*	2.2	1.6	No	2016	2017	Decay of natural and man-made deposits
Alpha emitters pCi/L	0	15	<0.39	<0.44	No	2016	2017	Erosion of natural matter
Combined	0	5	0.2	0.9	No	2016	2017	Erosion of natural matter
*The MCL for beta particles is 4 mrem/yr. EPA considers 50 pCi/L to be the level of concern for beta particles								
Lead and Copper								
Contaminant/Unit of Measurement	MCLG	MCL	90 th Percentile; # of Samples > AL	Exceedance	Date of Sample	Typical Source of Contamination		
Lead ppb	0	AL=15	<2 No samples exceeded the AL	No	2021	Corrosion of household plumbing systems; Erosion of natural deposits		
Copper ppm	1.3	AL=1.3	0.0844 No samples exceeded the AL.	No	2021	Corrosion of household plumbing systems; Erosion of natural deposits		
Disinfection Byproducts								
Contaminant/Unit of Measurement	MCLG	MCL	Level Found (Range)	Violation	Date of Sample	Typical Source of Contamination		
Haloacetic Acids (HAA5) ppb	NA	60	0.0 - 1.7	No	Quarterly 2021	By-product of drinking water disinfection		
Total Trihalomethanes (TTHM) ppb	NA	80	3.9 – 8.4	No	Quarterly 2021	By-product of drinking water disinfection		
Disinfection Residual								
Contaminant/Unit of Measurement	MRDLG	MRDL	Level Found (Range)	Violation	Date of Sample	Typical Source of Contamination		
Chlorine ppm	4	4	1.10 (1.01 – 1.24)	No	Monthly	By-product of drinking water chlorination		

The waterworks owners prepared this Drinking Water Quality Report with the assistance and approval of the Virginia Department of Health (VDH). Please call if you have questions.

SHELTER RENTAL 2022

Shelter #1 (11:00 a.m.-4:00 p.m.)	\$30.00
Shelter #1 (4:00 p.m. – closing)	\$30.00
Shelters #2-4 (11:00 a.m.-4:00 p.m.)	\$25.00
Shelters #2-4 (4:00 p.m. – closing)	\$25.00
Shelters #5-6 (11:00 a.m. - 4:00 p.m.)	\$20.00
Shelters #5-6 (4:00 p.m. - closing)	\$20.00
Gazebo (All Day)	\$25.00

SEASONAL LEAF AND GRASS REMOVAL

Curbside removal service for leaf and grass and other organic yard debris continues every Friday through November. Leaves must be in biodegradable bags and placed curbside by noon. Please visit our town website www.newmarketvirginia.com or call the town offices at 540-740-3432 for more information or questions pertaining to this service.

PET WASTE

Pet waste left on the street or lawn does not just go away or fertilize the grass. Rain washes pet waste down storm drains and into waterways like rivers, bays, and beaches. Pet waste also provides a nitrogen source for algae blooms, which deplete the water of oxygen and can make people and animals sick.

The Town of New Market has an ordinance regarding pet waste. Sec. 14-3.1 – Unlawful to allow dogs to defecate on public or private property; exception

a) No person shall knowingly or willfully allow a dog belonging to him or in his custody to defecate on the private property of other persons without the consent of such persons, or to defecate on public property; except that defecation by a dog on such property shall not constitute a violation of this section if the owner or person in custody of the dog immediately removes the material defecated and disposes of it in a safe and sanitary manner.

b) Any person violating and foregoing provisions of this section shall be guilty of a class 4 misdemeanor for each violation.

What You Should Do

• Keep a supply of bags handy

When walking your pet, take a bag with you for quick waste pick-up. It helps to keep a supply of bags near your dog leash and to tie the bags on the leash if you don't have a pocket or pack. Consider re-using plastic newspaper bags or bread bags. Use the bag to pick up the waste, and tie it closed. When at home, long-handled pooper-scoopers are available at pet stores make it easy to pick up after pets without stooping over.

• Dispose of pet waste properly

Place sealed bags of pet waste in the trash. It may help to double bag dog waste or kitty litter. Do not throw waste near or into storm drains, and do not dump kitty litter outside. Do not flush pet waste down your toilet.

• Follow local rules and signs

Some cities and towns have fines for not picking up waste on streets, in parks, or in dog parks.

• Help others remember to scoop the poop

Don't let your pet pollute, and encourage those around you to be responsible pet owners, too.

YARD SALES

As spring approaches we begin thinking about yard sales. The guidelines below are a good reminder on the rules and regulations in town regarding these sales.

Guidelines

1. All individuals conducting a yard sale are required to obtain a yard sale permit from the Town Office prior to the sale.
2. In residential districts, a household is only allowed two yard sales annually. There is no fee associated with permits for these two sales and sales cannot exceed a 72-hour consecutive period.
3. In commercial districts, a household is allowed two yard sales annually with no fee associated with the permits for these two sales. If the householder wishes to hold additional sales an annual permit must be obtained at a fee as set from time to time by the Town Council. Each yard sale in a commercial district cannot exceed a 72-hour consecutive period every three months.
4. Signs shall NOT be placed on telephone poles, power poles, street signs, public trees, sidewalks or any other publicly owned and/or maintained places or structures. All signs shall be limited to private property and shall be removed within 24-hours after the conclusion of the sale.

5. During the weekend of the Route 11 Yard Crawl, the Town will not count participation in that event towards total allowable yard sales on an annual basis.

6. Civic organizations are exempt from the above regulations, except for #4.

Questions?

You may contact the Town Office, Monday – Friday, during regular business hours with questions regarding this service.

MOVIE NIGHT

Enjoy a movie under the stars in the New Market Community Park! Starting this month, there will be movies offered once a month through September.

Bring chairs/blankets/snacks for your viewing comfort.

Showing: Willy Wonka and the Chocolate Factory

Date: June 25, 2022

Sundown: approx. 9:00 pm

Cost: FREE

Sponsored by: Amy Helsley, Financial Advisor with Edward Jones
Sheila Hall Realtor with Coldwell Banker Premier

CROSS ROADS MUSIC FEST 2022

We are kicking off our 8th annual Cross Roads Music Fest on June 3rd!

We are excited to be bringing this series back to New Market. All concerts are held at the Rebel Baseball Park, highlight musical talent, and offer a relaxing evening.

Bring chairs/blankets for comfort. Food and beverages available for purchase, and a beer/wine garden is also available for adults 21+.

Performing is "Who Shot John"

Date: June 3rd, 2022

Time: 6:30p-9:00p

Where: Rebel Baseball Park

CALENDAR OF EVENTS

June 2022

- 3 Lawn and Leaf
- 3 Cross Roads Music Fest Featuring Who Shot John** 6:30-9:00 pm
- 4 Open Market- Truist Parking Lot 9:00-2:00 pm
- 5 First Half Real Estate and Personal Property Tax Bills Due
- 10 Lawn and Leaf
- 15 Water/Sewer Bills Due**
- 17 Lawn and Leaf
- 20 Town Office Closed in Observance of Juneteenth**
- 21 Town Council Meeting 6:30 pm
- 24 Lawn and Leaf
- 25 Movie Night in the Park starting at sundown**

July 2022

- 1 Lawn and Leaf
- 4 Town Office Closed in Observance of Independence Day**
- 5 Independence Day Celebration**
- 8 Lawn and Leaf
- 8 Cross Roads Music Fest**
- 15 Water/Sewer Bills Due**
- 15 Lawn and Leaf
- 18 Town Council Meeting 6:30 pm
- 22 Lawn and Leaf
- 23 Movie Night in the Park**
- 29 Lawn and Leaf
